TORIQUL ISLAM

Toriqul.islm@gmail.com • +8801994222089 • B-2/G-12 Agargaon, Dhaka-1207, Bangladesh

EDUCATION

American International University (AIUB)
BSc in Computer Science 2026
Dhaka, Bangaldesh

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies.

Mohammadpur Preparatory School and College 2023
HSC *Dhaka, Bangladesh*

Strong foundation in Physics, Chemistry, and Biology with practical laboratory experience, along with advanced Mathematics including calculus, algebra, and statistics to develop strong analytical and quantitative skills.

Shere-E-Bangla Boys High School and College
SSC 2021
Dhaka, Bangladesh
Strong foundation in Science, Mathematics, and English enhancing problem-solving and analytical skills

SKILLS

Technical:

Programming Languages: C#/.NET, JavaScript, HTML,CSS, Python, Java, C++
Frameworks & Libraries: React.js, Node.js,Unity
Databases: SQL, Realm Database
Systems & Tools: Kali Linux, Bash scripting
Developer Tools: Vmware, Git, Visual Studio, Unity Studio

Personal:

General Business Skills: Problem-solving, System Architecture, OOP Principles, Data Analysis, Teamwork, Communication
Languages: Bengali (Fluent), English (Good), Hindi (Speaking)

PROJECTS

Gym Management System (C#/.NET, SQL Database)

- Developed a database-driven management system to handle member registration, attendance tracking, and billing operations.
- Implemented features to add, update, and delete member records with secure data handling.
- Integrated bill payment management for tracking membership fees and transactions.
- Designed modules to manage staff information, salary records, and overall gym operations efficiently.
- Applied Object-Oriented Programming principles and SQL database integration for structured data management.

Shop Management System (Java, Swing GUI)

- Developed a desktop-based shop management application to manage products, sales, and inventory efficiently.
- Implemented automatic profit and loss calculation based on sales and purchase data.
- Integrated stock management features including out-of-stock and low-stock warning alerts.
- Designed a monthly sales tracking system with Data Grid View to monitor transactions and performance.
- Built using Java Swing with event handling, structured logic implementation, and user-friendly interface design.

Tic-Tac-Toe Game (JavaScript)

- Developed an interactive browser-based game using JavaScript with dynamic DOM manipulation and game logic implementation.

Rock Paper Scissors Game (HTML, CSS, JavaScript)

- Designed and implemented a responsive game interface using CSS and JavaScript with real-time result display and user interaction.

Amazon Clone Website (HTML, CSS)

- Created a static e-commerce homepage clone to practice responsive layout design, Flexbox, and CSS styling techniques.

INTERESTS

Artificial Intelligence and Machine Learning, Computer Vision and Image Processing, System Architecture
